CERTIFICATE

WORK EXPERIENCE

4/2024 - 6/2024

WangFang Company

REMOTE PART TIME

- Developed and customized WordPress front-end interfaces with focus on UI/UX optimization and visual quality.
- Customized Odoo modules to meet specific project requirements.
- Designed and implemented intuitive, flexible web layouts using Elementor and related tools.

8/2024 - 10/2024

VNTech Company

FRONT-END DEVELOPER

- Developed responsive user interfaces using ReactJS, TailwindCSS, and JavaScript based on Figma designs.
- Managed state and optimized performance with React Hooks.
- Integrated and rendered dynamic data from APIs according to user flow.
- Collaborated with team members via Git/GitHub for code review and version control.

12/2024 - 3/2025

WGenTech Company

FRONT-END DEVELOPER

- Built and managed Shopify e-commerce websites, developing front-end interfaces based on Figma designs using HTML, CSS/SCSS, and JavaScript.

- Customized and extended Shopify themes with Liquid to meet client requirements and optimize UX/UI and conversion rates.
- Implemented interactive features such as product filtering and tag-based categorization using Liquid, JavaScript, and AJAX.
- Created reusable Sections, Blocks, and Snippets for flexible content editing and improved code efficiency.
- Utilized Shopify Metafields to manage and display dynamic product, blog, and collection data.

● 4/2025 - 10/2025

Ok-Hub Company

FRONT-END DEVELOPER

- Built and developed WordPress-based CMS for website content management, integrating front-end using Next.js, TailwindCSS, TypeScript, PHP, GSAP, Swiper, and Shadcn.
- Designed, implemented, and optimized UI/UX based on Figma layouts, ensuring fully responsive performance across all devices.
- Integrated and processed data from REST API, implementing features such as pagination, filtering, search, form handling, and dynamic rendering.
- Worked with ACF, Contact Form 7, and Metafields to display dynamic content and manage flexible data structures.
- Developed interactive animations and UI effects using GSAP and SwiperJS to enhance user experience.
- Managed version control and team collaboration via Git/GitHub/GitLab, participated in code reviews and performance optimization.
- Optimize assets (images, CSS, JS) for faster page loading and higher Lighthouse scores.
- Apply lazy loading, code splitting, and caching techniques.
- Follow best practices for SEO structure: semantic HTML, meta tags, heading hierarchy.
- Handle CRUD operations, pagination, filtering, and search functionalities.
- Manage state using React Hooks (useState, useEffect, useContext, useReducer, useContext).
- standard Next.js folder structure and building reusable hooks

PROJECT

● 12/2024 - 3/2025

WGENTECH COMPANY

Front-end

1. *Orangy*

- Developed and customized Shopify websites using ReactJS, Liquid, HTML, CSS/SCSS, and JavaScript.
- Created and optimized custom Themes, Sections, and Blocks for flexible content management in Shopify Admin.
- Integrated and managed dynamic data via Shopify Metafields and GraphQL APIs (Storefront & Admin).
- Designed and improved product and collection pages with filtering, variants, and dynamic pricing features.
- Ensured responsive layouts across all devices and improved performance through reusable Snippets.

● 6/2025 - 10/2025

OK-HUB COMPANY

Front-end

1. *Hong Ha Tour*

- Next.js, TailwindCSS, GSAP, Swiper, Shadcn, TypeScript
- Developed key pages (Home, About, Description) from Figma designs. Built responsive layouts, implemented GSAP animations, Swiper sliders, and booking forms connected to backend APIs.

2. *Mapi Travel - Tour Booking Platform*

- WordPress (ACF, CF7, PHP), Next.js, Tailwind, GSAP, TypeScript
- Built tour detail and listing pages, integrated dynamic data via REST API, and optimized booking/contact forms. Combined GSAP, Swiper, and Shadcn for animation and interaction effects.

3. *Inno - Admin & Account Management System*

- WordPress, PHP, JavaScript, HTML/CSS
- Developed login/logout, order list, and account pages. Integrated REST APIs, handled authentication (JWT), and created UI components like popups, filters, and loading states.

4. *Amamy - FAQ Management Module*

- WordPress (ACF), Next.js, Tailwind, JavaScript
- Created a dynamic FAQ feature with CMS integration via REST API. Built responsive layouts and optimized UI/UX.

5. *VAA - Corporate Website*

- WordPress, PHP, HTML/CSS, JavaScript

- Refined homepage and post detail UI, improved responsiveness, and enhanced content management with ACF.

10/2025 – Hiện nay

HUPUNA COMPANY

Fullstack

1. *Hupuna chat*

- Use Next.js, TailwindCSS, GSAP, Swiper, shadcn/ui, and TypeScript to develop features and design following the Zalo style.
- Use MongoDB to manage folder data, media, chats, and user information.
- Use MEGA to manage uploaded data, and sockets to handle real-time chat responses.

2. *Hupuna-folder*

- Use Next.js, TailwindCSS, GSAP, Swiper, shadcn/ui, and TypeScript to develop the main pages, building features and designs following the Driver style.
- Use MongoDB and MEGA to manage folder and media data.
