SUMMARY

Passionate Developer experienced in **NestJS**, **ReactJS**, and database management. Skilled in problem-solving and system optimization, with a strong desire to learn and contribute to impactful projects.

TECHNICAL SKILLS

- Frontend:** ReactJs, Antd, Taiwind CSS
- Backend:** Node.js, NestJS, RESTful API, MYSQL, MongoDB
- Tools & Services:** Git, GitHub, Postman, Supabase, Vercel, Render

WORK EXPERIENCE

Frontend Developer

9/2025 - 11/2025

ITS TELECOM WEBSITE | Freelancer

Tech Stack: ReactJS, TailwindCSS, Redux Toolkit, Payment Gateway Integration

- Developed responsive e-commerce platform for telecom services (SIM cards, data packages, mobile top-up) using ReactJS and TailwindCSS, ensuring seamless experience across all devices
- Implemented product catalog, shopping cart, checkout flow with payment gateway integration.
- Built user dashboard for subscription and order management with real-time updates.
- Designed responsive, mobile-first interface based on Figma specifications.

PROJECT

Badminton Court Booking Platform

7/2025 - 9/2025

Full-stack Developer (Solo Project)

Demo: <https://badminton-finder-v2.vercel.app>

Github: https://github.com/khoaadmt/badminton_finder_v2.git

Tech Stack:

- Frontend:** ReactJs, Antd, Taiwind Css, Redux toolkit
- Backend:** NestJs, PostgreSQL
- Services:** Supabase (Storage, Database), ZaloPay, Goong Map API

Main functions:

- Login with Google or Facebook
- Create and manage posts to find badminton partners
- View and search posts from other players
- Find badminton courts nearby with real distance calculation
- Book courts and pay securely through ZaloPay
- Edit personal information and view booking/post history
- Manage courts (add / edit / delete)
- Auto-complete address input using Goong Map API
- Approve or reject user posts
- View revenue analytics by day, month, year, or per court
- Export transaction data as CSV files

Coffee Discovery & Booking Platform

Backend Developer

10/2025 - 11/2025

Github: <https://github.com/khoaadmt/caffinder.git>

- **Tech Stack:**

- **Frontend:** ReactJs, Antd, Taiwind Css, Redux toolkit
- **Backend:** NestJs, PostgreSQL
- **Services:** Supabase (Storage, Database), Goong Map API

- **Main functions:**

- Role-based login for User, Owner, and Admin
- Search nearby eco-friendly coffee shops with real distance calculation
- View shop details, read reviews, and submit reviews after visiting
- Check table availability by time slot (remaining slots, current occupancy)
- Suggest alternative booking times when selected time is crowded
- Book tables and view booking history
- Owners can register and manage shops, menus, and menu items
- Owners can view revenue analytics
- Admins can manage shops, users, and reviews

EDUCATION

HANOI UNIVERSITY OF INDUSTRY

Major: Software Engineer | : GPA 3.0/4

2020 - 2024
